EDUCATION

BTech, Computer Science & Engineering Ahmedabad University

June 2020 – March, 2024

EXPERIENCE (1 Years)

Un-App Intelligence Private Limited April 2024 – Current (Mobile App Developer)

- Developed Un-App, an Android application that automatically picks up incoming calls using telecom services. Gained expertise in Android native development, telecom services integration, and implementing TensorFlow Lite models.

Plumscope LLP Dec 2023 – April 2024 (Intern Flutter Developer)

- Developed Infix, a school management system app using Flutter and Firebase. Gained experience in creating beautiful UI, integrating Firebase, and using the GetX state management framework

Inexture Solution Limited May 2023 – July 2023 (Intern Flutter Developer)

- Developed a Flutter e-commerce app using Flutter and Firebase. Enhanced Flutter development skills by building several basic apps and learned REST API implementation

PROJECTS

Un-App (Java)

- Automatically answers incoming calls based on predefined settings or user behavior patterns.
- Integrated Android telecom services to manage call states and actions.
- Utilized TensorFlow Lite for implementing machine learning models to enhance call handling features.

Infix Application (Flutter)

- Administrator dashboard for managing school operations, student records, and staff information.
- Teacher interface to manage classes, assignments, and communicate with students and parents.
- Student portal for accessing assignments, grades, and schedules and Parent portal to track student progress and receive school announcements.
- Built-in communication system for seamless interaction between all stakeholders.

Ecommerce Application (Flutter)

- User can register and signup and after then they can search for product and order it and then can track order.
- After then they can track order , otp system and data management and many more.

Yoga Application (Flutter)

- Guided yoga workouts with detailed instructions and visual aids.
- Local data storage using SQLite for offline access to routines and tracking data.
- State management handled by the Provider package for efficient and responsive UI updates.

Healthoholic (Figma)

- Visually appealing and user-friendly interface, designed to enhance user experience.
- Customizable workout plans tailored to individual fitness goals and Progress tracking through interactive charts and statistics.

TECHNICAL SKILLS

Programming	Flutter, Dart, Java
Database	SQL
Cloud Database	Firebase
Tools	Github, Flutterflow, Figma
